**An EHR designed for behavioral health that can adapt as you add new programs and services, CareLogic is:**

- Highly configurable
- Provides actionable data and analytics
- Integrates with other systems
- Backed by exceptional customer service

# CareLogic® Enterprise

## Better Reimbursement

CareLogic helps you navigate special state requirements, generate clean claims and meet the needs of value-based reimbursement. It is one reason so many certified community behavioral health clinics choose it.

Customers using a Qualifacts EHR have experienced an adjusted collections rate 4% higher than the industry average.

## Improved staff productivity

Identify the right provider by specialty and availability to make it easier to schedule in-person or virtual appointments.

Consumer friendly scheduling and appointment reminders improve no-show rates.

## Better outcomes

With Clinical Quality Measures built into the platform, see how your outcomes compare with national benchmarks.

CareLogic IMPACT provides research backed instruments that help track clinical progress in symptoms related to addiction, mental health, general health, functioning, domestic violence, medication monitoring, disability and trauma. IMPACTPRO puts assessments in the hands of your consumers.

Improve compliance and outcomes related to controlled substances with a solution integrated into the clinical workflow that provides data to prescribers that encourages compliance with best practices.

## Actionable Analytics and Reporting

Choose your own analytics tool and data warehouse through our connectors and use our interactive dashboards for organizational and role-specific measures in one simple click.

You can also easily generate reports focusing on 16 Clinical Quality Measures.

## Mobile

The CareLogic Mobile app enables clinicians to use key EHR functionality in the field without internet access.

**With CareLogic EHR, you have the freedom to focus on what matters. Discover the technology, support, and solutions that empower optimal care with operational ease.**
